

Mr. Serge Claudet

Serge Claudet graduated in 1989 as Mechanical Engineer in Paris, France. In 1991 he started working at the European Organization for Nuclear Research (CERN). First he was involved in the helium refrigeration project activities for LEP superconducting cavities and since 1997 he has been engaged in all types of helium refrigeration and the infrastructure for the Large Hadron Collider (LHC). Since 2007 Serge Claudet is Head of the LHC Cryogenic Operation team.
