

## Scotland the Brave?

As an American descended from proud Highlanders who withstood the atrocities wrought by the English following the Battle of Culloden in 1746, I now find my Scottish roots embarrassing. The decision to render the Lockerby bomber “compassionate consideration” could equally have been met by bringing his family from Libya to witness his final hours rather than granting him unwarranted freedom to return home. The present judiciary of Scotland are in sore need of the Bravehearts from its past that brought honor to their nation instead of the dishonor they bestowed last week.
