

Nuclear

1. Most of technical issues have been identified and are starting to be addressed
 - Generation IV Roadmap Formulated
 - Lead Concept is a High Temperature Reactor for Electricity and H₂ Production – Next Generation Nuclear Plant (NPNG)
 - International participation
 - However, concepts and approach need more transparency and better vetting

Nuclear

2. Systems and economics issues have not been addressed nearly as well technical issues
3. Roadmaps have been good for setting goals
4. System Scalability
 - One step away on nuclear side
 - Needs a lot of development on H₂ side

Nuclear

4. Human Resources Needs Attention

- Market much larger than current and near future supply
- Need better dissemination of information and opportunities
- Would require another \$10-20M/yr in efforts (at \$100k per person)
